First months of L.K. in Japan (1876) (1)

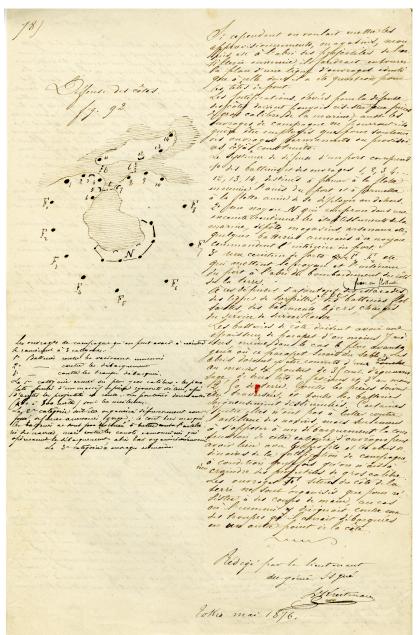

- 6 Feb : Arrival in Yokohama
- 14 Feb in the Notebook «First lecture hall in the Military School»
- 19 Feb. in the Notebook
 « Now for three days I've been working for drafts of my lessons »
- 1 Mar. The first lesson of fortification?
- 6 Mar. The first lesson of topography?
- Letter dated on 25 Mar

« Now I do a week two lessons of topography, two practical exercises of topography in the field, two lessons of fortification, and three conferences. In addition, I must supervise the copy and the translation of my draft, the lithography of the text, figures, the instruments of topography, sketches and drawings that I have made by professors ... ».

The last page of the MSs (79p.) of the topography, dated on 8 May 1876 (21 x 32.7 cm)

The last page of the MSs (p.79) of the fortification, dated on May 1876

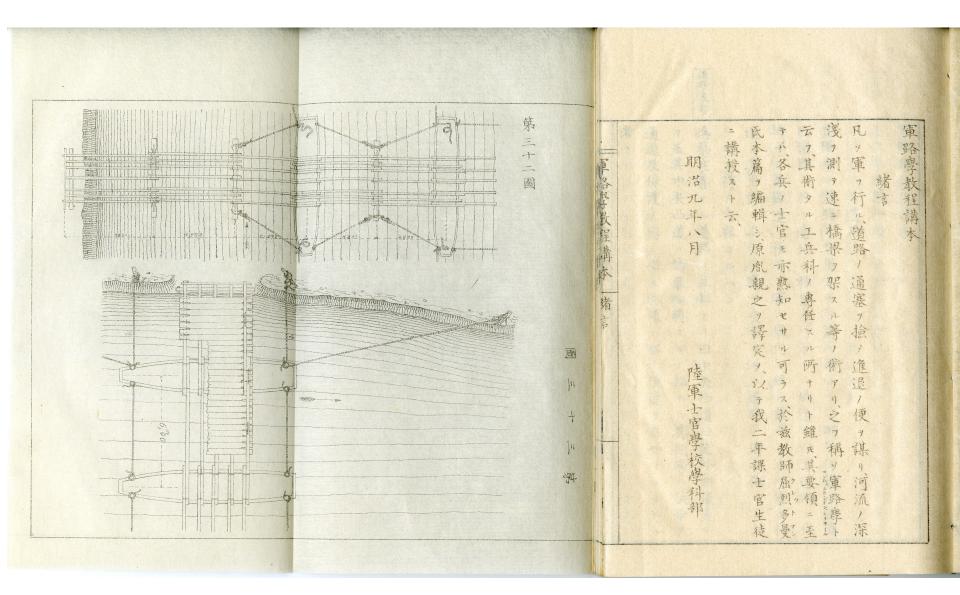

First 7 months of L.K. in Japan (1876) (2)

- From 11 to 22 Apr. Journey to Hakone area
- 8 May Finishes 79p. MSs of topography
- Before 16 May Finishes 79p. MSs of fortification.
- Letter dated on 16 May
 - « I've finished writing the famous lessons of topography and of fortification. The lessons will finish in mid-June, but that does not mean I'll be short of work. They have already given me the responsibility of about twenty lessons of chemistry and of some complementary lessons of mathematics.»
- 17 Jun. The first lesson of chemistry

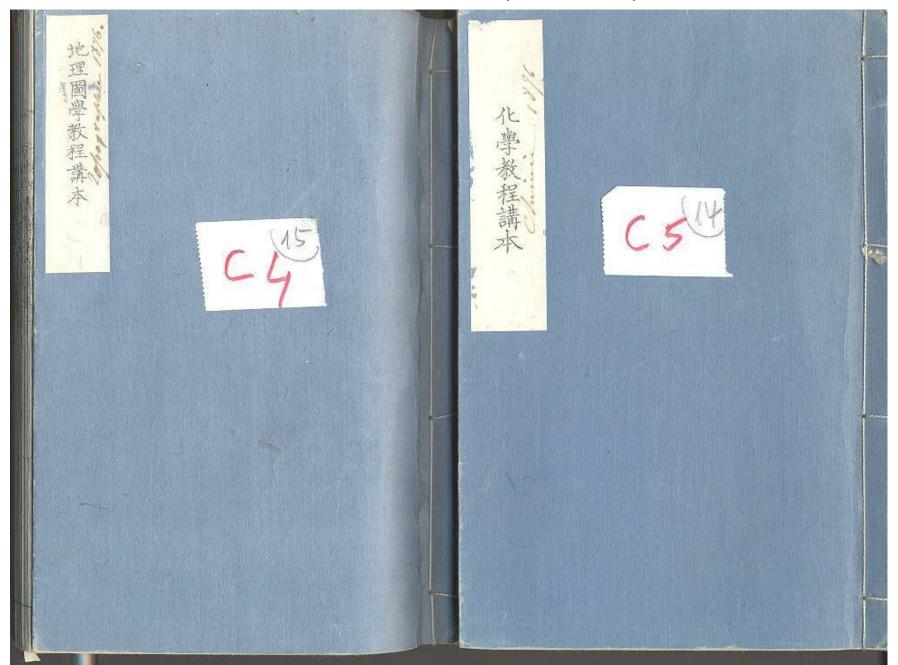

First 7 months of L.K. in Japan (1876) (3)

- Letter dated on 13 Jul. «Now, I'm working very hard for the lessons of permanent fortification, bridge and roads etc., which I must give after vacation. My chemistry course will finish soon. Of all courses, it is certainly the most amusing. I keep one copy of each translated textbook of my courses. One day my colleagues will be interested in these copies. In Europe, they wouldn't believe that we must work with so much care for the instruction of the Japanese who were barbarians some time ago. »
- 15 Jul. Finished the MSs of "Military transportation" (22p.)
- From 31 Jul. to 9 Sep. Summer vacation
- From 3 Aug. to 16 Aug. Journey to Kôbe, Shimonoseki, Nagasaki
- 6 textbooks published during Aug.

Textbook on the « Military transportation » (« Communications militaires » in French, 『軍路学教程講本』) (Aug. 1 8 76), 58 p. 52 fig. MSs, dated on 15 July 1876, are 22 p. The figures are on the «Pontoon bridge » (« pont de bateaux »; 舟橋)

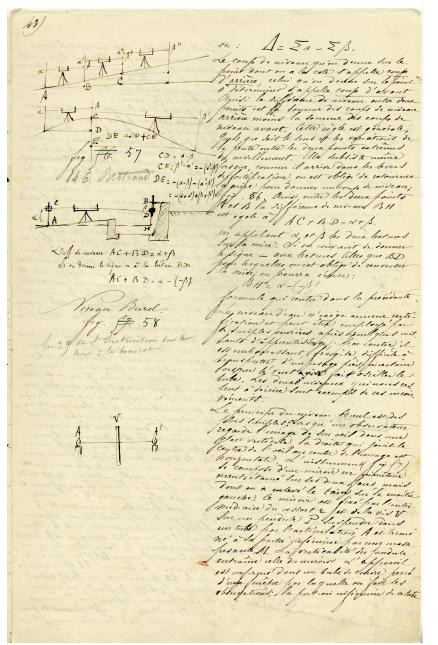

Front cover of two textbooks, (18.5 x 12.6 cm)

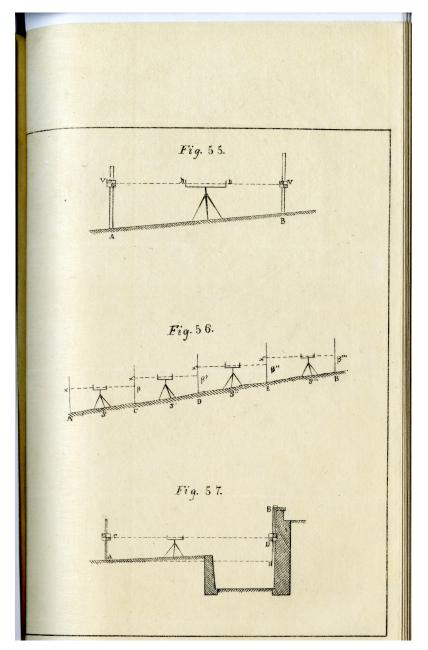

Textbooks and MSs in the Kreitmann Collection

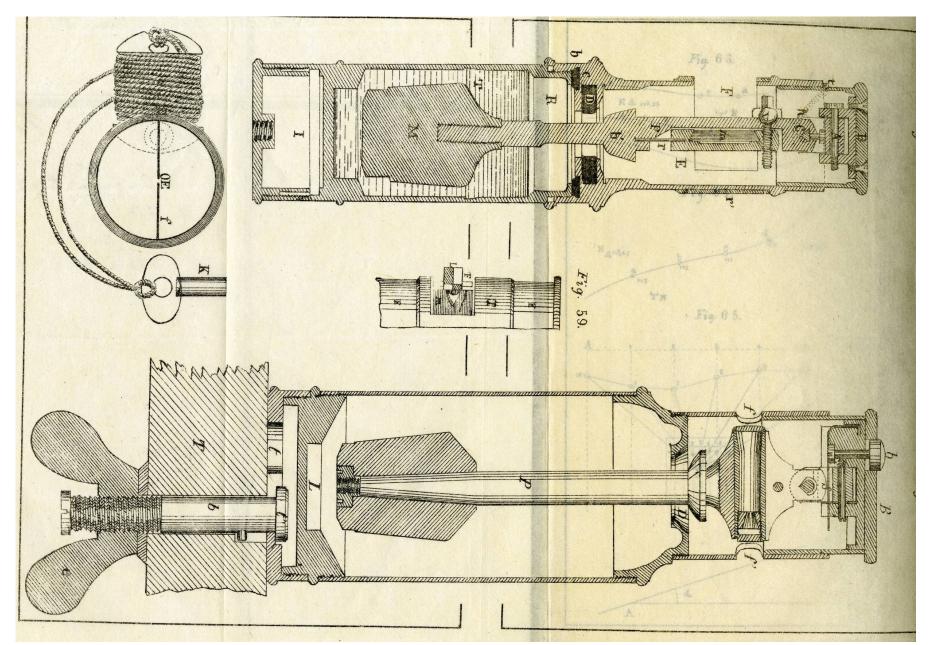

- 18 textbooks published during L.K's 2 years stay in Japan. L.K. is a author of 17, and a supervisor of all (esp. for the figures).
 - 8 textbooks of L.K. are published in Aug. or Sep. 1876. These present 942 p. and 386 fig. in total. The MSs identified of 7 of these 8 are 321 p. in total.
 - 1 trans.(50p.) from a French textbook ,appears in Oct. 1876
 - The others 9, all about the permanent fortification, are without date of publication, but certainly published in 1877. These textbooks present 196 p. and 330 fig. in total. MSs with title « Permanent fortification », all dated on 1877, classified in 5 parts are 362 p. in total.
- The whole documents hold in the collection: 813 p. of MSs for lessons, 90 sheets of figures, 90 sheets of diverse notes.

Example of figures (1); MS and textbook (« Topography »)

Example of figures (2); figure of a level (« Topography »)

Lithograpy and photograpy

- Artist-painter, Yokoyama Matsusaburô (横山松三郎, 1838-83), worked in the Academy from 1876 to 81, to improve and use these new technologies, which he had learned from Shimooka Renjô (下岡蓮杖, 1823-1914).
- L.K.'s Photo album « Italie, Suède, Japon » contains pictures of buildings of the Academy taken by Yokoyama.

First 7 months of L.K. in Japan (1876) (4)

- In the letter dated on 10 Oct., part written on 15 Sep. «Sometimes I ask myself if it's really I who make made such works as survey, drawing of fortification etc. in a natural grand scale, because that is exactly what I was doing myself in a small scale a little time ago as student. It's true that a officer of my grade has many things to gain and nothing to lose, working alone for some time. Here in Japan, I have to take the initiative in a way that a simple lieutenant would never take in France. When the captain Vieillard was there, I had less things to do than now, what is normal because I'd just arrived. But now, by confidence or by indifference, the captain Jourdan let me do everything. I make orders of instruments, reconstructions of the office of topography, relief maps of fortification, absolutely as I like. And here the other colleagues work similarly, each one in his speciality.»
- 20 Sep. Finished the MSs of "Permanent fortification" (28p.)
- 2 textbooks published during Sep.
