\* Academic charges are applied to academic and research institutions (universities, junior colleges, technical colleges, inter-university research institutes, and educational and research institutions, etc.)

\* For public libraries, a charge of 52,500 yen (including tax) will be applied for the moment. (Trial service)

\* Overseas educational and research institutions are subject to the same charges as Japanese institutions.

Note 1: The "number of staff" is taken to be the number of teaching/research staff primarily conducting research on information relating to Japan.

Note 2: Institutions in developing countries (defined as countries listed in Part I of the OECD Development Assistance Committee's List of Aid Recipients) are subject to half the charges applied to other institutions.

\* When usage starts partway through the fiscal year (April-March), the charge will be a pro rata charge based on the number of months of usage.

Example: A university with 90 teaching staff starting to use the service on July 1: 52,500 yen × (9 months/12 months) = 39,375 yen.

\* If usage is terminated partway through a year, an annual registration fee that has already been paid cannot be returned.

**National Institute of Informatics (NII)** has been contributing to the establishment, diffusion, and promotion of scientific information in Japan by providing NACSIS-CAT (Catalog Information Service), NACSIS-IR (Information Retrieval Service), NACSIS-ELS (Electronic Library Service), and various other services.

NII is now constructing the platform GeNii to integrate the contents of the services and link them to scientific information resources in and outside Japan. New functions will be progressively released to meet users' needs.
